

Jesper Jansson Reflection week 4

What do I want to learn or understand better?

I want to better understand how to incorporate stakeholders. Currently this hasn't been taken much into consideration during the sprints so I want to incorporate more of that in order to learn about it.

How can I help or someone else, or the entire team, to learn something new?

I can spend more time teaching and less time developing.

What is my contribution towards the team's use of Scrum?

I read more up on the final report and was able to pinpoint some things we missed.

What is my contribution towards the team's deliverables?

I pulled my share this week but considering my experience I should be able to do more.
