

Individual reflection Week 4

By Alexander Bratic

- what do I want to learn or understand better?

Continue to increase my understanding of back-end development with spring and java. To understand the Google API request better.

- how can I help someone else, or the entire team, to learn something new?

Don't think I know something someone else doesn't, but if I increase my knowledge in some part of the project I might be able to explain it to someone who needs help.

- what is my contribution towards the team's use of Scrum?

Helped with the meetings. I haven't had a specific role. I will help to write more user stories and tasks.

- what is my contribution towards the team's deliveries?

I've written some classes that will generate json files that might be relevant later.
Helped with the team reflection.
