

Individual reflection Week 5

By Alexander Bratic

- what do I want to learn or understand better?

Learn React, Typescript, next.js, html and other things that will help me contribute to the web page. Continue on the subjects from previous weeks.

- how can I help someone else, or the entire team, to learn something new?

Don't think I know something someone else doesn't. I found some sources that might be helpful to the group and plan to show them on the next meeting.

- what is my contribution towards the team's use of Scrum?

Contributed to the meetings. I haven't had a specific role. I can offer to be PO or Scrum master, next time the opportunity presents itself.

- what is my contribution towards the team's deliveries?

This week was not good from my part. I got stuck with installing yarn and getting everything to work. Then I started learning React and such, to be able to do my task, but ended up being busy with another assignment in another course. I helped with the team's weekly reflection and supervision meeting.
