

Individual Reflection week 3

This week we started with our first sprint; in my user story I been working on to deliver a java GET request. It's been interesting to work with http and java spring and I'm looking forward to learning more, to be able to contribute towards our teams' goals and be able to help my fellow teammate. We also hade our first team supervision and we got some good feedback on our user stories.

- What do I want to learn or understand better?
Http and java spring.
- How can I help someone else, or the entire team, to learn something new?
Find good information about java spring and http.
- What is my contribution towards the team's use of Scrum?
Been active in meeting and supervision.
- What is my contribution towards the team's deliveries?
Working on this week sprint to deliver a java GET request.
