

## Individual reflection Week 2

By Alexander Bratic

- what do I want to learn or understand better?

How to work with scrum, how to write stories and make good and short sprints. How to get information from Google Maps API, front-end development with react or web development in general.

- how can I help someone else, or the entire team, to learn something new?

Don't think I know something someone else doesn't, but if there is something new to learn I can offer to study it and then show everyone else.

- what is my contribution towards the team's use of Scrum?

To be active and engaged. To come with suggestions and to help write stories.

- what is my contribution towards the team's deliveries?

This week it's helping with project scope and project pitch.
