

I want to learn the concepts of scrum and sprint, and how they affect working pace together with what difference in results they provide.

I have to learn how to listen better and how to implement the ideas of others into the project and how to fit their ideas with mine.

My contribution to the scrum team will probably consist of asking questions people haven't thought of, and coming up with obnoxious solutions.

My contributions to the teams deliveries will mostly consist of optimising things we haven't thought of and getting rid of unoptimised solutions.
