Individual Reflection week 7

Perhaps the most challenging sprint so fare as we have chosen to implement the most difficult task last, auto complete. It is also clear that I lack basic understanding of React, for me I would have been easier if the project had been done in JavaScript/TypeScript so I could learn the basics first. Implementation of auto complete and other Google components would also have been much smoother.

- What do I want to learn or understand better?
  I would like to learn the basic JavaScript and TypeScript.
- How can I help someone else, or the entire team, to learn something new?
  Share my experience I got from working with Google Auto Complete and Google Direction Api.
- What is my contribution towards the team´s use of Scrum?
  Be present and active in scrum stand up meeting and retrospective meeting.
  Will start writing finale report with my fellow teammates.
- What is my contribution towards the team´s deliveries?
  Implement Google Auto Complete to search bare.
